

# T SPORT Racing

## Very interesting week of filming and testing for T Sport Racing! (April 2018)

It was an unusual and interesting weekend for T Sport Racing – but all in all a good one! We started unusually early, arriving at Pembrey Circuit in Wales on Thursday morning along with a professional photographer and cameraman. Having fantastic weather on our side, we enjoyed a full day of video and photo shooting to capture the new team colours resulting from an increased level of partnership with PE Automotive. The whole team had a lot of fun participating in this event! Afterwards, we also had a day of performance testing providing some very promising results! Now, we are really looking forward to seeing the results of our work.

The preparation started straight after the race at Brands Hatch. We got the truck back and washed it first. Then, we stripped it down completely – engine, gearbox, front and rear axle were removed and so was almost any bracket on the chassis. The truck had never been taken apart to such an extent since it was built last year! All of this was made for a single purpose: to change the colour from red to PE Automotive “Steel Blue”. We really love the new livery and had great reactions from everyone who already saw it! Sign Dezign knocked it out of the park with the design of our new stickers and banners. Thank you guys!

The filming was the first order of the day with some cracking shots and clips of the truck in action, keep an eye on us to see the finished product! Friday was a performance test session so we could assess how well the truck performed after some planned modifications! It’s safe to say we are really pleased with the lap times and the handling of the truck!

We wasted no time starting the journey back to the workshop for another 3 days of videos, pictures, team interviews and much more! We will be releasing footage and behind the scenes shots over the coming weeks, along with our updated website and social media, so look out and make sure to stay tuned! Here are some teasers of what we were up to.
